

Empowering Students to Solve World Challenges

“You never change things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete” - *Buckminster Fuller*

~ ***This Is The New Model*** ~

What Are The World's Biggest Problems?...

War, Political Corruption, Scarcity, World Hunger, Food Insecurity, Mental Illness, Cancer, Heart Disease, Infertility, Environmental Pollution and Deforestation, Poverty and Unemployment, Mass Extinction, Tyranny, The Rise of Artificial Intelligence.

**We will reverse ALL of these problems
by integrating the solution into the fabric of our society!**

“Though the problems of the world are increasingly complex, the solutions remain embarrassingly simple.” - *Bill Mollison*. **This Is The Embarrassingly Simple Solution!**

The Solution:

**1. Create awareness of the simple idea whose time has come:
We need to take the poisons out of our lives and grow food instead of lawns.**

“There is one thing stronger than all the armies in the world, and that is an idea whose time has come” - *Victor Hugo*. **This Is The Idea Whose Time Has Come!**

**2. Influencers organize call out and invite the corporations and individuals to sell LIFE
INSTEAD OF DEATH, to catalyze a shift in awareness that leads to mass adoption.**

“Those who love peace must learn to organize as effectively as those who love war”
- *Martin Luther King, Jr.* **This Is How We Organize For Peace!**

Schools and School-Teachers, your students will learn how to grow their own food, and see the value in taking care of the world they live in. Subjects such as biology, environmental science, nutrition, mathematics, economics and art will be integrated within. Children will experience planting a seed, watching it turn into life and grow, getting hands on and connecting with nature. Public areas of society will have shared gardening spaces, which promotes social interaction, knowledge sharing and contributing to local food banks and community feeding programs. The school lawns could be turned into food forests. The prison-like look of schools could be replaced with a lively creative environment.

Every park will grow food. Every hungry person will have access to food. Every school and prison will become a nursery. HOAs and Churches will create and support CSA programs.

To get specific, here is one of the things we are doing: Second Chance University, the Largest University in the World is working with the Council of 12 to implement this strategy in prisons.

“Whatever the mind can conceive and believe, it can achieve.”- Napoleon Hill.

Can you conceive of a world at peace? Believe it!

If you desire a future of abundance for our grandkids and beyond, please share this timely message.

If you'd like to join one of the movements already happening, you may find a list at **Unite.Live**
