THE HEALING WEB

A GUIDE TO HOLISTIC & ALLOPATHIC HEALTH CARE

The Healing Web is a bi-hemisphered index of holistic and pharmacological remedies for most common illnesses and conditions. It's a visual aid to illustrate the variety of alternative therapies available, and the central importance of diet in treating all diseases. Western Medicine, though useful at times, is built on toxic treatments that fail to address the true causes of disease, and draw trusting patients into lifelong treatment plans. The web includes the historical origins of both systems in the upper corners of the diagram. An optimal approach to healthcare would utilize the best techniques of both systems. Let the Healing Web guide YOU to find lasting physical and spiritual healing.
